KEY INFORMATION SUMMARY, BRORA AND HELMSDALE MEDICAL PRACTICE

Key Information Summary has been introduced in the Scottish NHS service. Its purpose is to allow relevant health care professionals to electronically access a *limited portion* of your GP records if you need medical care when the surgery is closed. The main situation would be when you consult an Out of Hours GP. The other health care professionals who could access your records would be Ambulance Control, NHS 24 and hospital doctors. The practice fully supports this initiative as we know how useful it is to an Out of Hours doctor to have some information about you.

Key Information Summary is limited to lists of

- Conditions you are / have been affected by (a GP will ensure that only information which is currently relevant to you is included)
- Medication
- Allergies

If you consent to allow the above health care professional to have the ability to access your Key Information Summary please complete the following.

Signature:

Name:

Address:

Date of Birth:

Relationship to child if signing on behalf of a child under 16.
